Article

Hosted at Peppers Resort Noosa, blueAPACHE has once again participated in the leading technology summit for the legal industry. blueAPACHE along with its key alliance partners Hewlett Packard Enterprises (HPE) & Palo Alto Networks spent two great days engaging with some of Australia's leading Law Firms. As Australia's leading event for the legal IT community, blueAPACHE had an audience engaging with and presenting to industry professionals about all things cyber security and as a service consumption in an always-on world. This year's theme focused on security in an increasingly sensitive, competitive and governed market. The event looked at law firm technology strategies, while discussing topics, such 'old' new technologies like AI and information availability and a cloud first world. Michael Zuppa, GM of Technology from blueAPACHE, along with guest speaker Diego Maravakin, Lead Channel Sales Engineer from Palo Alto Networks spoke about how together blueAPACHE and Palo Alto Networks are preventing cyber threats & automating detection, looking into the 'how' and 'what' firms are doing to secure and make data available anywhere, on any device at any time. Keeping in line with the market demands of balancing resource requirements with financial flexibility, working with transparent technology partners such as blueAPACHE who can provide guarantees around data sovereignty on enterprise class cloud platforms is more critical than ever. blueAPACHE's "always-on" multi cloud solutions powered by HPE & Veeam combined with our expertise in highly regulated

industries are the perfect fit for the Australian Legal Sector.

"We are proud to be a part of The Lawtech Summit 2018 and are really excited to be working with such a dynamic industry and group of companies.", says Andrew Harris, General Manager of Sales at blueAPACHE.
