

We achieve ISO 27001 certification for information security - blueAPACHE

Canonical: <https://www.blueapache.com/blog/blueapache-awarded-iso-27001-certification-for-information-security>

Details:

2019

Global IT service We have been awarded ISO/IEC 27001 certification.

Operating for over 20 years, we have been recognised for our compliance to the ISO 27001:2013 information security standard. The certification was awarded after a comprehensive audit of how the security of assets is managed, including financial information, intellectual property, personally identifiable information as well as any information which is entrusted to us by clients. There is a total of 114 controls and 10 clauses that make up the certification which include requirements for systems access control and management, information security policies, physical and environmental security and security incident management. Founder and Managing Director, Chris Marshall, said "I am extremely proud that we can formally announce our ISO 27001 certification. This certification is a true testament to our commitment to information security."

"Not only is the ISO certification a validation for our own team, but it means that our customers can feel further assured that they are working with a managed service provider that delivers outstanding solutions to complex technology problems, all backed by a secure (ISO certified) infrastructure on a global scale."

This achievement provides further evidence that we are amongst the world's best managed service providers.

Background

ISO/IEC 27001 is a global standard for an information security management system (ISMS). The framework serves as a guideline towards continually reviewing the safety of your information – PECB

About blueAPACHE

Since 1998, we have helped organisations in Australia, New Zealand, Asia and North America leverage technology to their business advantage by delivering comprehensive IT management, cloud, network, voice, software and consulting as a converged service – when they need it, as they need it. This is true IT as a Service. This is who we are. To learn more, visit www.blueapache.com
