

Optimise Productivity with a Microsoft 365 Licencing Review - blueAPACHE

Canonical: <https://www.blueapache.com/blog/optimize-productivity-with-a-microsoft-365-licencing-review>

Details:

January 30, 2024

Our evaluation will examine your organisation's Microsoft software inventory, identify licenses that are not in use or unassigned, identify underused key productivity applications, and uncovers licence cost optimisation & technology adoption opportunities.

License review benefits:

- Maximise productivity levels
- Streamline licence levels and allocations
- Enhance technology adoption and therefore value for money

In addition, we can also perform Microsoft 365 tenancy security audits and reporting, and implement Backups for M365.

We are a Microsoft Gold Partner

Over the years, we've assisted numerous organisations in leveraging the advantages of the modern Microsoft 365 workplace. Our comprehensive offerings cover design and deployment services, licencing, user adoption, and the provision of Microsoft 365 Managed Services.

Please contact Daniel Matias, our Sales Specialist for Microsoft Licencing for more information here .

What does your Microsoft 365 licensing review examine?

Our evaluation examines an organisation's Microsoft software inventory, identifies licenses that are not in use or unassigned, identifies underused key productivity applications, and uncovers licence cost optimisation and technology adoption opportunities.

What are the benefits of a Microsoft 365 licence review according to you?

The license review benefits include maximising productivity levels, streamlining licence levels and allocations, and enhancing technology adoption and therefore value for money.

Do you offer any additional Microsoft 365 services beyond the licensing review?

Yes, we can also perform Microsoft 365 tenancy security audits and reporting, and implement Backups for M365.

Are you a Microsoft partner, and what services does it provide around Microsoft 365?

We are a Microsoft Gold Partner. Its offerings cover design and deployment services, licencing, user adoption, and the provision of Microsoft 365 Managed Services, and it has assisted numerous organisations in leveraging the advantages of the modern Microsoft 365 workplace.

Who should be contacted for more information about the Microsoft 365 Licencing Review?

Daniel Matias, our Sales Specialist for Microsoft Licencing, should be contacted for more information, via email at daniel.matias@blueapache.com.

What is an example of an organisation that benefited from a Microsoft 365 licensing and infrastructure review with you?

Archers The Strata Professionals, a Queensland-based strata management firm, engaged us for a comprehensive licensing and infrastructure review, migrating to managed Infrastructure-as-a-Service combined with license optimization.

What outcomes did Archers The Strata Professionals achieve through this review?

Archers achieved cost stabilization by removing unnecessary costs and reducing unplanned storage spending, modernized communications through a Microsoft Teams migration that delivered licensing savings and easier cross-channel/remote communication, and gained operational capability including expertise in application virtualization, managed detection and response, and Microsoft platforms for proactive technology planning and security resilience.

What did an Archers representative say about the outcome of the review?

An Archers representative reflected: "blueAPACHE was able to stabilize our spend and make it much more..." (predictable, as part of an operational expenditure service model).
