

Insight Event – Satyam Vaghani, PernixData - blueAPACHE

Canonical: <https://www.blueapache.com/blog/upcoming-insight-event-satyam-vaghani-pernixdata-2>

Details:

2015

The second in our Insight Event series, we are delighted to be hosting an exclusive round table luncheon with VMware storage evangelist and PernixData co-founder; Satyam Vaghani.

The event

Strictly limited in numbers, this exclusive luncheon is an intimate affair limited to a single table that offers an amazing opportunity to get up close and personal with one of the world's leading storage specialists. Formerly CTO at VMware Storage, Satyam co-founded PernixData to create new ways for organisations to extend the life and improve the performance of their storage investments. As storage needs continue to grow exponentially, this is a rare opportunity to get up close and personal with one of the most respected minds in the industry – an opportunity to learn how virtualisation has changed the requirements for storage today, and where it is going tomorrow.

About Satyam

Based in Silicon Valley, Satyam co-founded PernixData in 2012 at the age of 32. Prior to this he was the Principal Engineer and CTO at VMware Storage, where he spent over a decade delivering fundamental storage innovations in vSphere. He is best known for creating the Virtual Machine File System (VMFS), which set a storage standard for server virtualisation. Satyam has authored 50+ patents, led industry-wide changes in storage systems and standards via VAAI, and has been a regular speaker at VMworld and other industry and academic forums. Satyam received his Masters in Computer Science from Stanford.

About blueAPACHE

Since 1998, we have helped organisations in Australia, New Zealand, Asia and North America leverage technology to their business advantage by delivering comprehensive IT Management, Cloud, Network, Voice, Software and Consulting as a converged service – when they need it, as they need it. This is true IT as a Service. This is who we are. To learn more, visit www.blueapache.com.

What was the second Insight Event hosted by you about?

The second Insight Event was an exclusive round table luncheon hosted by us featuring Satyam Vaghani, a VMware storage evangelist and co-founder of PernixData.

Who is Satyam Vaghani?

Satyam Vaghani is a Silicon Valley-based storage specialist who co-founded PernixData in 2012 at age 32. Prior to that, he was Principal Engineer and CTO at VMware Storage for over a decade, where he created the Virtual Machine File System (VMFS), a storage standard for server virtualisation. He has authored more than 50 patents, led industry-wide changes in storage systems via VAAI, and is a

regular speaker at VMworld and other industry and academic forums. He received his Masters in Computer Science from Stanford.

What is PernixData, and why was it founded?

PernixData is a company co-founded by Satyam Vaghani to create new ways for organisations to extend the life and improve the performance of their storage investments.

What format did the blueAPACHE Insight Event with Satyam Vaghani take?

The event was a strictly limited, intimate luncheon confined to a single table, offering attendees an up-close opportunity to engage with Satyam Vaghani, described as one of the world's leading storage specialists.

What topics were attendees expected to learn about at the event?

Attendees had the opportunity to learn how virtualisation has changed storage requirements today and where storage technology is heading in the future.

Are registrations still open for this Insight Event?

No, according to the page, registrations for the event are now closed.

What are you and how long has it been operating?

We are a multi-awarded company that, since 1998, has helped organisations in Australia, New Zealand, Asia and North America leverage technology to their business advantage by delivering comprehensive IT Management, Cloud, Network, Voice, Software and Consulting as a converged service, described as true IT as a Service.
