Article

Microsoft has announced that Windows 10 will officially reach its End of Life (EOL) on October 14, 2025 . This means that after this date, Windows 10 devices will no longer receive security updates, patches, or technical support. If your business is still relying on Windows 10, it’s time to start planning your next steps to ensure your systems remain secure and compliant. What Happens After Windows 10 EOL? Once Windows 10 reaches EOL:

Microsoft will no longer provide security updates , leaving devices vulnerable to cyber threats.

Businesses still using Windows 10 may fall out of compliance with industry regulations.

Older hardware may face compatibility issues with new software and applications.

Organizations may experience higher IT support costs due to outdated systems requiring additional maintenance.

What Are Your Options? To continue operating securely and efficiently, businesses have two primary options:

Option 1: Upgrade to Windows 11

If your current hardware is compatible with Windows 11, upgrading is the most straightforward solution. Newer devices come pre-installed with Windows 11, ensuring long-term support, improved security, and access to the latest features. We recommend upgrading by October 14, 2025 , to avoid any service interruptions.

Option 2: Windows 365 Business Basic + Extended Security Updates

For businesses with hardware that cannot be upgraded to Windows 11, Microsoft's Extended Security Updates (ESUs) provide a temporary solution. By purchasing a Windows 365 Business Basic license (RRP: $58 per user per month) , users can continue using their Windows 10 devices with extended security updates for up to three years beyond the EOL date. Additionally, businesses can opt to:

Continue using their Windows 10 device with ESUs.

Convert their device into Kiosk mode , automatically logging into a Windows 11 Cloud PC included in the Windows 365 Business Basic license.

How blueAPACHE Can Help

At blueAPACHE , we understand the challenges of transitioning to a new operating system. Our team is here to provide expert guidance and seamless migration services to ensure your business remains secure and operational. We offer:

Comprehensive IT assessments to determine your best upgrade path.

Procurement support for new Windows 11 hardware.

Windows 365 and ESU setup for businesses needing extended support.

Frequently asked questions

When does the article say Windows 10 reaches End of Life, and what stops after that date?

The article says Windows 10 reaches End of Life on 14 October 2025, after which devices will no longer receive security updates, patches, or technical support from Microsoft.

What two upgrade options does the article present for businesses still on Windows 10?

The article presents upgrading to Windows 11 on compatible hardware, or purchasing a Windows 365 Business Basic licence with Extended Security Updates for hardware that cannot be upgraded.

What does the article say the Windows 365 Business Basic licence costs, and what does it provide?

The article says the Windows 365 Business Basic licence has an RRP of $58 per user per month and provides extended security updates for up to three years beyond the Windows 10 EOL date, or the option to run devices in Kiosk mode connecting to a Windows 11 Cloud PC.

What four services does the article say blueAPACHE offers to support the Windows 10 transition?

The article lists comprehensive IT assessments, procurement support for new Windows 11 hardware, Windows 365 and ESU setup, and ongoing IT support and security monitoring.

Is the information in this post still current?

No. It reports the Windows 10 End of Life deadline of 14 October 2025, which has now passed; for blueAPACHE's current device and security guidance, see the emPOWER Security pillar page rather than this post.

Knowledge Base

When will Windows 10 reach its official End of Life (EOL)?

Microsoft has announced that Windows 10 will officially reach its End of Life on October 14, 2025.

What happens to Windows 10 devices after the End of Life date?

After October 14, 2025, Windows 10 devices will no longer receive security updates, patches, or technical support from Microsoft.

What risks do businesses face if they keep using Windows 10 after EOL?

Businesses face several risks: Microsoft will no longer provide security updates, leaving devices vulnerable to cyber threats; businesses may fall out of compliance with industry regulations; older hardware may face compatibility issues with new software and applications; and organizations may experience higher IT support costs due to outdated systems requiring additional maintenance.

What are the main options for businesses to address Windows 10 EOL?

Businesses have two primary options: Option 1 is to upgrade to Windows 11 if current hardware is compatible, ideally by October 14, 2025, to avoid service interruptions. Option 2 is to use Windows 365 Business Basic combined with Microsoft's Extended Security Updates (ESUs) for hardware that cannot be upgraded to Windows 11.

How does the Windows 365 Business Basic + Extended Security Updates option work?

For businesses with hardware that cannot be upgraded to Windows 11, purchasing a Windows 365 Business Basic license (RRP: $58 per user per month) allows users to continue using their Windows 10 devices with Extended Security Updates for up to three years beyond the EOL date. Businesses can

also convert their device into Kiosk mode, which automatically logs into a Windows 11 Cloud PC included in the Windows 365 Business Basic license.

What services do you offer to help businesses transition away from Windows 10?

We offer comprehensive IT assessments to determine the best upgrade path, procurement support for new Windows 11 hardware, Windows 365 and ESU setup for businesses needing extended support, and ongoing IT support and security monitoring to keep systems protected.

How can a business contact you to discuss a Windows 10 upgrade strategy?

Businesses can email us at marketing@blueapache.com or call 1800 248 749 to discuss their Windows 10 upgrade strategy.

By what date do you recommend upgrading to Windows 11?

We recommend upgrading to Windows 11 by October 14, 2025, to avoid any service interruptions.
